

"FROM OUR SOLUTIONS TO YOUR PRODUCTION"

Attn: Prospective Employer

March 20, 2015

I am writing to recommend Bruce Branstad, whom I have known for 20 years as a candidate for the job position at your company. I have worked closely with Bruce at his previous position at Medtronic Diabetes solving manufacturing issues and implementing processes that enhance quality and streamline the production process.

Bruce possesses many skills used in the manufacturing industry from Mechanical to Electrical, Solidworks, Mastercam, and many things in between. But in my opinion Bruce has 2 very unique qualities that are hard to find, 1) Bruce keeps track of himself. He understands that when asked to do a task, the process requires a well thought out plan that needs to be executed to reach the end of the task. 2) Bruce does what he says he will do. He does not require following up on him to make sure he is working towards the goal whatever simple or complex the task may be.

Bruce is a very quick learner and I believe without a doubt he can help your organization improve in any position he is applying for.

Sincerely yours,

Michael R. Giboney
